Staging Concepts Introduces All-Weather Portable Platform Designed for Outdoor Events

MINNEAPOLIS (November 12, 2020) – Timing is everything! This adage certainly rings true in the latest product innovation from Staging Concepts. At a time when being outdoors has never been more essential, the Minneapolis-based provider of portable staging solutions has introduced the new [Clima-Core™ Platform](#), an ultra-durable, semi-permanent, weather- and water-resistant platform specially designed for outdoor use.

Featuring a heavy-duty honeycomb core top suitable for all climates, the Clima-Core is ideal for a wide range of outdoor events and occasions. Its resilient design will withstand virtually any type of weather conditions and won't rot, swell, warp or absorb moisture.

"The Clima-Core platform is a perfect example of the right product at the right time," said Cindy Albrecht, director of sales and marketing for Staging Concepts. "With events and activities increasingly shifting outdoors due to health and safety guidelines, venues and organizations of all types are in need of staging solutions that can be set up anywhere and under any conditions."

Clima-Core offers the same strength and durability as Staging Concepts' cornerstone [SC90® Platform](#) with the added benefit of being able to endure extreme temperatures and inclement weather. The single-sided, demountable design is constructed with an extruded aluminum frame combined with a sturdy non-wood composite substrate and topped with a black high-density polyethylene (HDPE) finish. Each platform features a load rating of 150psf and includes a UV resistant surface.

"The core feature of this durable, all-season platform is, essentially, its core," noted Albrecht. "In addition to being weather-resistant, the composition of the platform is impervious to insects, such as ants, termites, moths, bugs and beetles, making it an ideal solution for long-term outdoor placement. Plus, you won't find a product like this anywhere else on the market."

Clima-Core platforms are available in standard and custom sizes. Standard sizes include 4' x 8', 4' x 6', 4' x 4', 3' x 8', 3' x 6' and 2' x 8' and are compatible with Staging Concepts' [SC90 Fixed](#) and [Adjustable](#) Leg Supports, [SC9600 Bridge Supports](#), and the company's full line of accessories including [skirt clips](#), [chair stops](#) and [closure panels](#).
