

HANDICAP ACCESSIBLE RAMPS

Many venues and events require handicap accessible spaces, which is why Staging Concepts offers portable handicap accessible ramps to match up to its portable platforms. These ramps are available to match your stage height, whether it is fixed or adjustable. Additionally, Staging Concepts' handicap accessible ramps can be custom designed to meet the needs of the space. To make ramps compliant with ADA standards, Staging Concepts recommends and provides quadruple, slip resistant surface along with a continuous handrail.

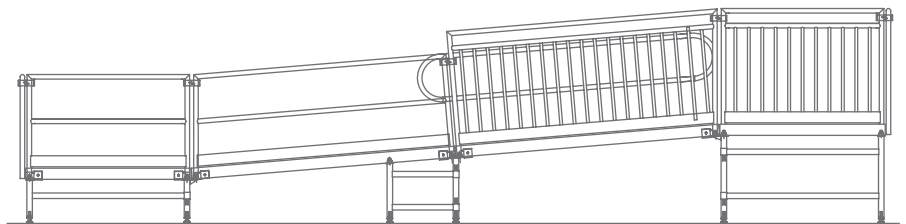

The following are example layouts for a 36" high Handicap Accessible Ramp matching up to a 36" high stage.
