

CATWALK SYSTEMS

Staging Concepts' staging systems and products are designed to maximize the functionality of any performance setting. We specialize in developing custom solutions to meet the needs of your theater and help you maximize your space.

To enhance an existing historical venue or be part of a new theater design, we offer a durable catwalk solution. By using our innovative Relia Beam support structures and SC90® Platforms, we can design a safe and reliable system to install above the stage and/or audience. This elevated walking system helps to keep staff, lighting products, and other staging equipment out of the audience's view.

By using our Relia Beams, the aluminum material helps reduce the weight of the overall system and also helps lessen the amount of weight on any existing structures. The catwalk system can be integrated into an existing structure, requiring few or no changes, therefore appealing to renowned theaters to help uphold their historical significance.

Contact a Staging Concepts representative today to discuss adding a durable catwalk system to your theater.

ELEVATE YOUR EXPERIENCE

Performing art centers, theaters, and auditoriums demand durable and high-quality equipment, and we can perfectly fulfill this need.

We look forward to discussing your theater needs.

We elevate all people's abilities to safely access and enjoy amazing life experiences.
